Wind Farms and Wind Resource Potential in Kansas

MW - megawatts

Kansas Wind Farms (2014)
- ▲ Existing (2,911.7 MW)
- ▪ Under Construction
- ● Proposed

Wind Power Density at 50m (W/sq. m; 2009)
- Poor (0 - 200)
- Marginal (200 - 300)
- Fair (300 - 400)
- Good (400 - 500)
- Excellent (500 - 600)
- Outstanding (600 - 800)
