

New COVID-19 Cases per Million Residents, 7-Day Rolling Average

Kansas and Missouri population-adjusted cases through January 2, 2022

Source: Institute for Policy & Social Research, The University of Kansas; data from The New York Times.

Note: Beginning March 8, 2021, Missouri cases include probable cases identified through antigen testing. Missouri cases also rose the week of April 18th due to erroneous counting of duplicate cases.
